Work Experience

Huawei Technologies

June 2018 Until now

Frontend Developer

As a frontend engineer, I am developing applications and automation systems by using javascript, react/redux, react native, C# and etc. The mentioned skills was utilized by my job experience at Huawei technologies, where I participated in more than 12 world class web and mobile app projects. Im not nvertheless able to disclose the details of the projects I participated in Huawei, as I must respect the confidentiality policies of that organization as I have committed.

Eligasht

Tehran, Iran

February 2018 to May 2018

Software Development Expert

As a software programming specialist, I developed 2 Javascript libraries, a datepicker and a custom autocomplete library, also designed and developed multiple telegram robots by using C#

7sang Group

Tehran, Iran

June 2016 to February 2018

Front end developer

Design and develop multiple web applications. As a full stack developer I was using c# and asp.net mvc for backend, and frontend languages and frameworks.

Shaar

Tehran, Iran

June 2015 to March 2016

Front end developer

As a frontend developer, I was in charge of designing and developing the UI of the taxiiran project.

IpLadona

Tehran, Iran

January 2014 to February 2016

Network technician

I was in charge of cabling and troubleshooting of passive networks and participating in big scale projects such as:
-Establishing the data center of tabriz government
-Cabling and troubleshooting of the "bonyad e melli nokhbegan".
-Cabling and troubleshooting of the branches of social security insurance of Iran.
And etc.

Education

West Tehran Islamic Azad University

September 2013 to July 2017

Bachelor student, software engineering

Alavi Institute

December 2011 to December 2012

Diploma, Mathematics and Physics

Awards

Huawei TSC devOps team - Outstanding delivery support team award

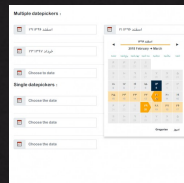

Additional Information

I should address my advance skills in HTML5 web development and CSS web styling approaches such as SCSS, Jss and etc. In order to be able to be in a same page with back-end team, my limited knowledge and experience of MySQL, MongoDB and SQL Server would facilitate this process while also considering the same with C#, ASP.Net and Python programing.

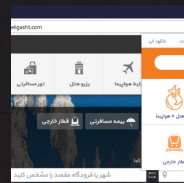

Achievements

Military Service	Completed
Certificate	PrePosition Competence Certification for Maintenance service (Partner) from Huawei Technologies No. SG020102401807638491449 from June 2019 to June 2021
