## About me

I'm a passionate front-end developer, My academic major was Electronics, but as I happened to work with and learn from many professional web designers and programmers, I found out that how much I wanted to work in web development field and I did it. I'm good with people, I like being busy and committed with my work, I have specific goals and I can't wait to start a project when I have an idea and some time. There's a lot of experiences that I want to try and I'm looking forward to work with new creative people.
